

**Fall
2021**

NURSING ASSISTANT CERTIFICATE

Program

Methodist College offers a flexible Nursing Assistant program to cater to students and working adults. The course is taught in the classroom as well as the college's Simulation and Clinical Practice centers, providing students a hands-on learning experience using high-fidelity manikins. The Methodist College Nursing Assistant program is certified through the Illinois Department of Public Health.

Nursing Assistants work directly with patients in a variety of health care environments. Nursing Assistants help dress and feed patients, keep bed linens fresh, aid in turning, walking or moving a patient into a wheelchair, take vitals, feed, and work closely with other personnel to observe, report and document changes in the patient. Nursing Assistants are true care givers who work in health clinics, hospitals, nursing homes, long-term care settings and hospice organizations.

Some Nursing Assistants use their experience to build their careers in health care by becoming medical assistants, nurses, lab technicians, therapists or a number of other positions in the field.

Nursing Assistants are in high-demand in the Peoria area and are considered Critical Professions by the Greater Peoria Economic Development Council. Local employers are actively recruiting Nursing Assistants for positions in a variety of health care settings. Some of these employers offer tuition reimbursement for Nursing Assistants who want to continue pursuing their education in other health related fields.
